

You Sit Where You Always Sat On the Seat of the Implement

You wouldn't think of riding on the back of one of your horses in order to guide your team. If you did you would have to have another person to operate the implement, because you know most farm implements require constant attention.

Then why attempt to operate a tractor in a manner which your experience has proven impractical? It is just as illogical to ride on your tractor in front of the implement, and expect to operate the implement from that position, as it is to operate the implement from the back of your horse.

Any way you look at it you are working at a disadvantage with the ordinary tractor. To do the best work two operators are required, one on the tractor and one on the implement. In these days of extreme labor shortage this is a tremendous handicap. With

the operator on a tractor in front of the implement it is manifestly impossible for him to give the implement attention and make adjustments for varying field conditions without losing time.

With the Moline-Universal Tractor you sit on the seat of the implement and have perfect control of both tractor and implement. You are in the best position to observe the work, make adjustments and manipulate both tractor and implement. This holds true regardless of the work being done—plowing, discing, planting, cultivating, mowing, harvesting, etc. There is nothing new about this, we simply apply a principle which millions of farmers have demonstrated to be sound. The Moline-Universal gives one man control of greater power than is possible with horses, with the same method of handling and as much versatility.

The one-man feature is just one of many advantages the Moline-Universal has over other tractors. It is the only tractor which will do all farm work, including cultivating. It is the only tractor regularly equipped with self starter and electric lights. Non-robust labor can operate it successfully, and it can be worked day and night.

No detail has been overlooked to give the new Moline-Universal Model D Tractor positive reliability. The perfected over-head valve 4-cylinder engine develops unusual power, and is economical in operation. It is conservatively rated at 9-18 H.P. Oil is forced to crankshaft bearings under 35 lbs. pressure. Gears are steel cut, drop forged, and heat treated. All shafts are splined. Every working part is easy to get at, and every moving part is enclosed.

Tile Drainage

The continuous rains will impress the need of thorough drainage on many owners of wet land. Land that is low and poorly drained will not dry out quickly and much damage will be the result. Corn that was planted in low places will be drowned out or the crop of weeds will get such a start that it will be stunted before the field is dry enough to be cultivated. Ditches will be a great benefit where properly located, in many fields. One can easily determine where a ditch will serve a good purpose. A small ditch dug now or a string of tile laid may save an acre of corn. For those places that need tile drainage but would not be drained this summer, do not wait until too late in the season to order your tile but do it now while the water is on the field.

H. W. Edwards, who bot the Roy Rucker 240 acres northwest of town, known as the John Tonin farm, has 200 acres of fine wheat which will hardly be ready to cut before next week. He has a nice bungalow on the farm now and will enlarge the barn this summer.

Summer Drinks

Hundreds of millions of dollars will be spent during the next three months for various concoctions called soft drinks and as the case last summer, those containing a narcotic of some sort will prove the favorite. The danger in all such beverages is the unfailing harmful effect of carbonic acid gas, necessary to effervescence. It is a scientific fact known to medical men for years that the regular consumption of any sort of drink infused with such gas is more destructive of the digestive organs than either brandy, whiskey, wine or beer and the miserable habit begins with children. A few years ago doctors were forced to interdict the use of ice cream, sodas by children.

Another feature of the matter is the profiteering price on such 'soft' drinks. Happily for the purses of indulgers, the price has been lowered to a nickel for pops and to ten cents for slops represented to be 'near beer.' None of the brands are anywhere near beer in any particular, even in quantity for the same jitney. Cones have a small ball of cream the size of a middle-man made to fit the top

of the now leather cornucopia shaped receptacle for the extraction of nickels and sundae are out of sight long before the thot of the cost is out of the mind.

Straight mush and Mussel fork water are far superior for health, decidedly economical comparatively considered and have the unquestioned right to first place in respect of ingredients being readily perceived. The first bottle of pop ever made was at the factory of Jos. Zeisler at St. Charles Mo. in 1860, and in February at that. He sure started something.

\$4,500 a YEAR

MEN and WOMEN (Clerk, sign, and mail this to-day)
JNO. F. DRAUGHON, at Louis, Mo. Dept. 2
Tell me why you were asked to send the Government hundreds of accountants (men or women), at \$4,500 a year; about your Higher-Accounting and Business-Procedure Course; how, by your method and in half usual time, you will train me at MY HOME or at DRAUGHON'S COLLEGE for position as bookkeeper or stenographer, at \$75 to \$125 a month, or as stenographer, at \$50 to \$75 a month; why training by your new plan is so easy and interesting one may forget he is studying—may absorb instruction; why 98 per cent of verbatim stenographers write the shorthand you teach; why concerns employ 500,000 persons you trained. I prefer training at _____ State home or college.

Before the Moberly police court were summoned two young girls, young in years and old in the ways which leads to destruction. One said she was from Kirksville and the other from Keytesville. The latter was a repeater, having been in court before and had been ordered never to come to Moberly again. The life of the street at night had hardened her face and dulled her sense of shame. The other girl appeared a kindred spirit. Claimed to have been with a concession at the carnival which showed here last week and had remained over on account of being sick.

Both were fined and promised to leave town.—Moberly Democrat.

For a Sprained Ankle

As soon as possible after the injury is received get a bottle of Chamberlain's Liniment, and follow the plain printed directions which accompany the bottle.

A supper in the woods was enjoyed by a number of society people last Friday evening, the guest of honor being Ben Agoe.

Not Original Cost But Upkeep

The well known saying "it isn't the original cost, it's the upkeep" is particularly applicable to the question now uppermost in the minds of automobile owners, viz: "Is Magneto Ignition Better Than the Battery System and Why?"

There are as many who argue in favor of one as the other, but aside from personal interests that might influence his opinion, there is no electrical engineer, or experienced motorist, who does not know the superiority of the magneto for creating the hottest spark and giving no cause for worry.

What does it matter if a magneto does add fifty dollars to the original price of a car if it makes the engine give more power under all circumstances, cost nothing for upkeep, and saves its cost many times over by using less gasoline?

A battery is all right for starting and operating the horn, for those purposes it has become a necessity but the only possible reason for using it, for ignition purposes is to save the first cost of installing a good magneto.

Naturally the automobile owner should pay for this, and if he is wise, he will not hesitate to do so, because he gets all the benefits, even if it is not part of the regular equipment of an otherwise good car.

Racing is the supreme test of power. All racers use magneto ignition. All motor trucks requiring the most power for heavy work use magnetos. Motor boats and airplanes use the magneto. The best passenger automobiles use it. It's better all the time and cheaper in the long run.

Woman's friend is a Large Trial bottle of Sanol Prescription. Fine for black heads, Eczema and all rough skin and clears complexion. A real skin tonic. Get a 50c trial bottle at the drug store.

Demands Good Roads Now

Discussing farm clubs opposing bond issues for hard surface highways the Springfield, Mo., Leader says:

Either the man who lives a long way from a city in the most remote corner of the county needs good rock roads to market or he doesn't need any. If he does he should have them and have them right away. We can build our good roads next year and be using them or we can dribble along for fifty years wasting money on little repair jobs here and there or on lightly constructed cheap roads which wash away and give out with a few years of storm and heavy traffic. Was it better to spend several dozen billions and call out everyone and win the world war quickly or take a life time paying for it as we went along by sending out a few hundred thousand soldiers as they might by chance volunteer? It is possible to raise enough money to build all these roads, build them well and have the job over so that the man who lives twenty miles from town will have the same advantages as the man who lives so close to town that he is assured some sort of a road or we can limp along with such roads as we have with all the counties around us building good roads with this state help. These are things which every tax payer and voter should consider before he condemns the bond issue on the grounds that it is larger than he had expected.

Do you get up at night? Sanol is surely the best for all kidney troubles. Sanol gives relief in 24 hours from all backache and bladder trouble. Sanol is a guaranteed remedy, 50c and \$1 a bottle at the drug store.

Mr. and Mrs. Jarve Bennett and family were visitors at the capital Saturday.

Live Stock and Farm Sale AUCTIONEER

Will sell any kind of property at public auction but specialize on LIVE STOCK. For reference consult any for whom I have conducted a sale. Address Salisbury, Mo., Phone 1516.

A. J. HOUSTON

Shannon Wayland spent last week with his wife here arranged to go to St. Louis to live where they will make their permanent home. He has a good position and will make a valuable man for his employers.

This is to notify the public that the price of Salisbury soda water is now five cents per bottle. 20 21 W. W. Garrett

Railroad wages have been increased a billion a year. The loss to the government is a million a day and yet Hines holds on and congress rubber stamps the bills.

To produce Dealers and Farmers: Mr. J. M. Borders, egg specialist from the Food Research Laboratory of the United States Bureau of Chemistry will meet all dealers and farmers interested in better grades of market eggs at the Will Moore Produce House in Keytesville at 2:30 p. m. July 2nd. This meeting is important because the new state law requires every dealer who buys eggs to have a state license and know how to grade eggs. Mr. Borders will help the dealers and farmers to grade, grade, and pack eggs to bring the highest price and to eliminate loss.

SAFE, GENTLE REMEDY BRINGS SURE RELIEF
